The Spanish Society of Medical Physics (SEFM) is created as a scientific society in 1974 with the aim of promoting and developing medical physics and the scientific and professional aspects of it. The SEFM brings together professionals who develop their activities related to Medical Physics in the areas of clinical assistance, research, education and industry. Currently, the SEFM is composed of about 700 members.

Since 2000, the SEFM publishes “Revista de Física Médica” (Journal of Medical Physics) as a body of scientific communication, technical and professional education, and where papers coming from the scientific community are published at the discretion of the Editorial Committee and Scientific Committee. It also has a web site (www.sefm.es) as a means of communication and information between members and the society. The SEFM participates in forums for joint action between companies and institutions, and maintaining dynamic relations and cooperation with national and regional institutions.

In the field of international collaboration, the SEFM is a member of international organizations in Medical Physics: International Organization for Medical Physics (IOMP) and European Federation of Organizations in Medical Physics (EFOMP). Also maintains special relations and collaboration with Latin American societies and with other national and international societies of their operating environment.

Medical Physics as activity, “Radiofísica hospitalaria” as profession and SEFM as organization; actively participate and collaborate in making the application of physics in the field of Health to be effective and safe, having great impact and importance in the processes of Health and contributing to improved health of citizens.

Benefits of SEFM membership:

1. Free access to our virtual library:

- Physics in Medicine and Biology
- Medical Physics
- Revista de Física Médica

2. Reduced SEFM courses registration fees.

3. Reduced SEFM meetings registration fees.

4. Access to the international and national SEFM grants.

5. SEFM technical reports and publications at reduced price.

6. Links with fellow workers in the field of Medical Physics.

7. The opportunity to become a member of Standing Committees, Working Groups or Specialist Interest Groups:

- Get involved with the development of training, professional standards and scientific areas
